[Cyclotomic field - Wikipedia](#)

In number theory, a cyclotomic field is a number field obtained by adjoining a complex primitive root of unity to \mathbb{Q} , the field of rational numbers. The n -th cyclotomic field $\mathbb{Q}(\zeta_n)$ (where $n > 2$) is obtained by adjoining a primitive n -th root of unity ζ_n to the rational numbers. The cyclotomic fields played a crucial role in the development of modern algebra and number theory because of
