[Future Value Calculator | Investopedia](#)

Future Value Calculator - The value of an asset or cash at a specified date in the future that is equivalent in value to a specified sum today.

[Future Value Calculator - Calculator.net: Free Online ...](#)

The future value calculator can be used to determine future value, or FV, in financing. FV is simply what money is expected to be worth in the future. Typically, cash in a savings account or a hold in a bond purchase earns compound interest and so has a different value in the future. A good example

[Future Value Calculator Online Calculator Resource](#) Future Value Annuity Formula Derivation. An annuity is a sum of money paid periodically, (at regular intervals).

Let's assume we have a series of equal present values that we will call payments (PMT) and are paid once each period for n periods at a constant interest rate i.

[Net Future Value \(NFV\) Calculator | Captain Calculator](#)

Net Future Value Calculator . What is Net Future Value (NFV)? Net Present Value (NPV) is a financial calculation used when determining the time value of money to determine the net future value of a series of financial streams.

[Future Value Calculator - eckwebsites.com](#)

Future Value Calculator Use this calculator to determine the future value of an investment which can include an initial deposit and a stream of periodic deposits. Javascript is required for this calculator.

[Future Value Calculator | FV Calculator](#)

The future value is calculated (initial amount plus the gain). The gain may be calculated based on a unit of time, say a month. In that case, a month's gain is always the same for the same annual rate and same principal balance regardless of the length of the month.

[TaxTips.ca - Present and future value calculator](#)

The present value is the amount that would have to be invested today at the given rate of return, in order to have the desired amount in the future.

[3 Ways to Calculate Future Value - wikiHow](#)

Calculate the future value of money using the formula. Suppose you invested \$5,000 in an account that paid 5 percent interest compounded annually for eight years. In this example, since the interest is compounded annually, there is one compounding period.
