The manifolds investigated in this monograph are generalizations of (XX)-rank one locally symmetric spaces. In the first part of the book the author develops spectral theory for the differential Laplacian operator associated to the so-called generalized Dirac operators on manifolds with cusps of rank one.

ON CONVEX PROJECTIVE MANIFOLDS AND CUSPS

ON CONVEX PROJECTIVE MANIFOLDS AND CUSPS 3 A maximal rank cusp is a cusp with compact boundary. These are the only cusps which appear in the finite volume setting. The projective orbifold $SL(3, \mathbb{Z})/SL(3, \mathbb{R})/SO(3)$ is properly, but not strictly, convex and has finite volume. The end is not a cusp.
