[Polynomial - Wikipedia](#)

A polynomial equation, also called algebraic equation, is an equation of the form  $a_n x^n + a_{n-1} x^{n-1} + \dots + a_1 x + a_0 = 0$ . For example,  $x^2 + 3x + 2 = 0$  is a polynomial equation. When considering equations, the indeterminates (variables) of polynomials are also called unknowns, and the solutions are the possible values of the unknowns for which the equality is true (in [Add or Subtract Polynomials - WebMath](#)). This page will show you how to add and/or subtract polynomials.
