The postnatal development of the human hippocampal formation (HF) is subject of increasing interest due to its implication in important pathologies that hamper the normal development of children. In this work, the authors present a glimpse of the main events that constitute important milestones in the development and shaping of some of the most important psychological capabilities such as autobiographical memory. Although they examined some cases in the last trimester of gestation, their

Postnatal development of the human hippocampal formation. L. Sress. University of P'es ; Research output: Contribution to journal Article. Abstract. Jean Piaget's theory suggests that cognitive development proceeds in discrete steps. The first is the sensorimotor period that happens in the first two years of life. In recent years it became clear, that it is necessary to have an intact

05. Hippocampal Development | Neuron Development Hippocampal Development This intriguing part of the cerebral cortex was one of the first structures we studied, so papers range in publication from the 1960s to the 1990s. We did not include this work in the NEOCORTICAL DEVELOPMENT book because the hippocampus is archicortex, not neocortex (NC in photo at right).
