The conference aim is to stimulate discussions of new ideas, mathematical methods and applications of group analysis to problems of nonlinear differential equations, difference equations and integro-differential equations in mathematical modeling.

Call for Papers: Proceedings of the International ...

Contributions to the conference include research articles on qualitative behavior of solutions of ordinary, partial, delay, fractional, abstract, stochastic, fuzzy, and set-values differential equations. Significant and relevant applications of the above are also encouraged.

Application of Fluctuationlessness Theorem on the ...

This work focuses on the numerical solution of ordinary differential equations in the absence of fluctuation. Here only the initial value problems are considered and the

solutions are obtained over the unit interval  $[0, 1]$ . The main purpose of this work is to obtain a general procedure for the numerical solution of Ordinary Differential Equations.
