A Survey of Lurie s A Survey of Elliptic Cohomology de nes a presheaf Oof cohomology theories on the étale site of $M/1,1$ (or at least on its restriction to a ne schemes), which we will also denote by $M/1,1$. We d like to take global sections to get a universal elliptic cohomology theory, but the geometry of "cohomology theories" is

rather unmanageable. Instead, we'd like to lift O_U to a presheaf of spectra. In fact, this involves some very
